PROFESSIONAL SUMMARY

BCA graduate (2025) aspiring to start a career in Data Analysis, currently learning Python (Pandas, NumPy, Matplotlib), SQL and Excel. Strong database foundation from working with MySQL (queries, joins, schema design) in real projects. Completed a 3-month internship at KARON Infotech, building a Flutter app used in production by real users. Quick learner seeking a Junior Data Analyst role.

CORE SKILLS & TOOLS

Flutter (Dart)	PHP	MySQL	REST API	Python (Learning)	SQL	Excel
HTML5 / CSS3	Bootstrap 5	NodeJS	ReactJS	Postman	Git / GitHub	Jupyter

★ **Data Analysis (Learning):** SQL, MySQL, Python (Learning), Excel, Jupyter, Pandas, Matplotlib

★ **Mobile App Development:** Flutter (Dart) — Cross-platform Android & iOS Development

★ **Backend Development:** PHP (Core PHP, REST API Development) .

★ **IDEs & Tools:** VS Code, Android Studio, IntelliJ, PyCharm Community, Spyder, WAMPServer64.

DATA ANALYSIS LEARNING

Data Analysis | Self-Study & Practice

Ongoing

- Using Python (Pandas, NumPy) for data cleaning, transformation and aggregation.
- Creating charts with Matplotlib to present insights clearly.
- Writing SQL queries, joins and aggregations to extract and analyse data (builds on MySQL experience).
- Using Excel formulas, pivot tables and basic dashboards; working in Jupyter Notebook for EDA.

WORK EXPERIENCE

Mobile App Developer Intern | KARON Infotech

3 Months

- Developed a Home Finder cross-platform mobile application using Flutter (frontend) and PHP with MySQL (backend).
- Implemented a smart search and filter system to find rental properties by type (flat, house, PG) and location.
- Built a rental listing module enabling property owners to post available homes for rent.
- Integrated RESTful APIs and Wrote MySQL queries and joins to power search and filter results; tested APIs with Postman.

Designed a clean, responsive UI/UX for smooth navigation and fast property access.

FEATURED PROJECTS

Home Finder Mobile App — Flutter · PHP · MySQL · REST API

Dataset / Context: Built during internship at KARON Infotech; deployed in production for real users.

- Rental property search and listing platform to find homes by type and location.
- Contributed to database schema design, API endpoints and the complete mobile UI.
- Key Learning: cross-platform development, API integration and database management.

Blood Bank Mobile App — *Flutter · PHP · MySQL · REST API*

Dataset / Context: *Cross-platform app for finding blood donors and requesting blood, similar in architecture to Home Finder.*

- Search and filter donors by blood group and location.
- Donor registration module so people can sign up as available donors.
- Integrated PHP REST APIs with a MySQL database for real-time donor search and requests.

Restaurant Management System — *ReactJS · NodeJS · MongoDB*

Dataset / Context: *Full-stack web application for restaurant operations.*

- Menu management, order tracking and customer records.
- Implemented MongoDB CRUD operations and dynamic ReactJS components.
- Key Learning: modular, component-based architecture for scalable code structure.

EDUCATION

BCA Mandvi Education Society, VNSGU, Surat	2025	Percentage: 61.00%
HSC (Class XII) GSEB	2022	Percentage: 57.67%
SSC (Class X) GSEB	2020	Percentage: 57.70%

CERTIFICATIONS

- TOPS Technologies — Data Analysis Training (Pursuing).

INTERESTS

Data analysis and learning new technologies · Mobile app development · Problem solving and coding.

SOFT SKILLS & ADDITIONAL INFORMATION

- Quick learner — adapts to new technologies rapidly.
- Team player — collaborated with the team during internship.
- Analytical, problem-solving mindset — strong in debugging and logical thinking; deadline-oriented.
- **Languages** — Hindi (Fluent), Gujarati (Native), English (Intermediate — technical reading and writing).
- **Nationality** — Indian
